

MRB Series

Exploded View

**FEATURES**

- Easy-Open Lid Enables “Tool-Free” Access to Connector
- Selection Includes Receptacle Plates Punched to Accept Popular Microphone Connectors
- Optional Carpet Trim Ring and Blank Plates are Available
- Leveling Screws Included

**APPLICATIONS**

Install Atlas Sound MRB Series wherever flush-mount floor receptacle boxes are needed for the connection of microphones and other accessories on stages and in auditoriums, churches, and public meeting places.

**GENERAL DESCRIPTION**

MRB Series. Microphone receptacle floor box with easy-open lid provides convenient and tool-free access to microphone connector. The lid is mounted on a pin hinge that lifts and swings to the side for access and then falls flush with the floor when not in use. Assembly contains four leveling legs welded to a 4" octagon box.

MRB Series models are offered with a choice of four mounting plates punched to accept a variety of connectors or with factory-installed connectors (see chart below). Blank plate Model MRB-PL may be ordered separately. Lid and trim cover are cast commercial red brass with a brushed finish; receptacle plate is spun aluminum.

Optional carpet trim ring Model MRB-TR is available for use in carpeted areas and provides an attractive finished appearance. It is fastened to the octagon box and has no protruding hardware.

**ARCHITECT AND ENGINEER SPECIFICATIONS**

Microphone floor receptacle shall be Atlas Sound MRB Series Model \_\_\_\_\_. Lid and cover shall be solid cast commercial red brass with a brushed finish. Lid shall require no tools for opening and shall be flush with the floor when closed. Receptacle shall have an adapter punched for a \_\_\_\_\_ microphone connector. A standard 4" (102 mm) octagon box shall be furnished with four leveling legs and four leveling screws. For installation in carpeted areas, optional carpet trim ring Model MRB-TR shall be ordered.

## DESCRIPTION

Professional appearance with easy and cost-efficient installation is achieved by using Atlas Sound wall plates. Models include mounting holes on standard box mount center [3-9/32" (83mm)] and plate mounting hardware. Units without devices are available in two materials: .031 stainless steel (S) and .032 anodized aluminum (A) which is ideal for painting.

Wall plates with pre-mounted connectors are standard with stainless steel plate. For surface mounting applications, optional enclosure Models E-11, E-12, and E-13 are available for one, two, and three-gang installations, respectively.
